On-Airport Logistics Services

Based in SuperTerminal 1 at Hong Kong International Airport, Hacis capitalises on its geographical advantage to offer Airport Direct import and export services, providing cost-effective logistics support solutions for freight forwarders to enhance their competitiveness.

Airport Direct services allow freight forwarders to streamline cargo handling flow by having Hacis' team collected and delivered import cargo to consignee on their behalf; and expedited export cargo consolidation and palletisation at Hacis Logistics Centre, saving time and resources.

Hacis Logistics Centre has ample warehousing capacity and is equipped with plentiful cargo handling facilities to process a large volume of time-critical shipments with maximum efficiency. Adjacent to the airside, the centre assures fastest cargo transfer between ramp and the air cargo terminals.

In addition to the local services, the established SuperLink China Direct road feeder services allow freight forwarders to deliver shipments between the airport and over 60 destinations in China under the secured and efficient Customs-bonded condition.
